JOURNAL OF AEROSOL SCIENCE

HONORARY EDITORIAL BOARD

M. M. BENARIE, 20 Blvd Jean Pain, 38000 Grenoble, France.

J. GEBHART, Institut für Biophysik, Univ. Frankfurt am Main, Bldg 74, Theodor-Stern-Kai 7, D-60590 Frankfurt, Germany.

D. HOCHRAINER, Boehringer Ingelheim KG, D-55216 Ingelheim am Rhein, Germany.

D. INGHAM, Department of Applied Mathematics, University of Leeds, Leeds LS2 9JT, U.K.

J. PICH, Institute of Biophysics, Salmovska 3, 120000 Prague, Czech Republic.

O. PREINING, Institut für Experimentalphysik, Universität Wien, Strudlhofgasse 4, A-1090 Vienna, Austria.

EDITORIAL BOARD

U. BALTENSPERGER, Paul Scherrer Institut, CH-5232 Villigen, Switzerland.

D. BOULAUD, Laboratoire de Physique et Métrologie des Aérosols, Commissariat a l'Energie Atomique, CEN/FAR, B.P. 6, 92265 Fontenay-aux-Roses Cédex, France.

C. F. CLEMENT, 15 Witan Way, Wantage, Oxon OX12 9EU, U.K.

E. J. DAVIS, Department of Chemical Engineering, BF-10, University of Washington, Seattle, WA 98195, U.S.A.

H. FISSAN, Universität Duisburg, Bismarckstrasse 81, D-47048 Duisburg, Germany.

L. GRADON, Institute of Chemical Engineering, Warsaw University of Technology, 00-645 Warsaw, Poland.

M. HAMPDEN-SMITH, Department of Chemistry, University of New Mexico, Clark Hall 103, Albuquerque, NM 87131, U.S.A.

H.-C. HANSSON, Department of Meteorology, University of Stockholm, Arrhenius Laboratory, S-10691 Stockholm, Sweden.

J. HO, Defence Research Establishment, Suffield, Box 4000, Medicine Hat, Alberta T1A 8K6, Canada.

H. HORVATH, Institut für Experimentalphysik, Universität Wien, Strudlhofgasse 4, A-1090 Vienna, Austria.

W. JOHN, 195 Grover Lane, Walnut Creek, CA 94596, U.S.A.

E. I. KAUPPINEN, VTT Aerosol Technology Group, VTT Chemical Technology, P.O. Box 1401, FIN-02044 VTT, Finland.

S. S. KIM, Korea Advanced Institute of Science and Technology, Department of Mechanical Engineering, 373-1 Kusong-Dong, Yusung-Gu, Taejon, 305-701 Korea.

M. KULMALA, Department of Physics, University of Helsinki, P.O. Box 9, FIN-00014 Helsinki, Finland.

A. A. LUSHNIKOV, Karpov Institute of Physical Chemistry, Ul. Obukha 10, 103064 Moscow K-64, Russia.

J. MARIJNISSEN, Faculty of Technology and Materials Science, Delft University of Technology, P.O. Box 5045, 2600 GA Delft, The Netherlands.

P. H. McMURRY, Particle Technology Laboratory, Department of Mechanical Engineering, 111 Church Street S.E., Minneapolis, MN 55455, U.S.A.

K. NICHOLSON, National Environmental Technology Centre, Culham, Abingdon, Oxon OX14 3DB, U.K.

K. OKUYAMA, Department of Chemical Engineering, Hiroshima University, Kagamiyama, Higashi-Hiroshima 724, Japan.

S. PRATSINIS, Department of Chemical Engineering, University of Cincinnati, 697 Rhoder Hall (ML-171), Cincinnati, OH 45221-0171, U.S.A.

D. Y. H. PUI, Particle Technology Laboratory, Department of Mechanical Engineering, 111 Church Street S.E., Minneapolis, MN 55455, U.S.A.

A. SCHMIDT-OTT, Prozess- und Aerosolmesstechnik, Universität-GH-Duisburg, Postfach 10 15 03, D-47048 Duisburg, Germany.

M. SHAPIRO, Faculty of Mechanical Engineering, Technion-Israel Institute of Technology, Technion City, Haifa, Israel.

D. L. SWIFT, Environmental Health Engineering, School of Public Health, The Johns Hopkins University, 615 North Wolfe Street, Baltimore, MD 21205, U.S.A.

H. TAMMET, Department of Environmental Physics, Tartu University, 18 Ulikooli Street, EE 2400 Tartu, Estonia.

C. S. WANG, Institute of Public Health, College of Medicine, National Taiwan University, No. 1 Jen-Ai Road, 1st Section, Taipei, Taiwan, Republic of China.

H.-C. WANG, Air Liquide, Chicago Research Center, 5230 S. East Avenue, Countryside, IL 60525, U.S.A.

In association with the European Aerosol Assembly (EAA)

President: R. JAENICKE (Germany)
Treasurer: G. METZIG (Germany)
Secretary-General: A. SCHMIDT-OTT (Germany)

CONTENTS

NUMBER 1

J. GEBHART — 1 — Smoluchowski Award: 1995 recipients

Regular papers

J. L. GRIFFIN and S. K. LOYALKA — 3 — Condensation on aerosol particles: boundary element formulation

E. HONTAÑÓN, M. LAZARIDIS and Y. DROSSINOS — 19 — The effect of chemical interactions on the transport of caesium in the presence of boron

M. HUSSAINOV, A. KARTUSHINSKY, A. MULGI and Ü. RUDI — 41 — Gas–solid flow with the slip velocity of particles in a horizontal channel

YONG JAE SUH and SANG SOO KIM — 61 — Effect of obstructions on the particle collection efficiency in a two-stage electrostatic precipitator

A. JAWOREK and A. KRUPA — 75 — Generation and characteristics of the precession mode of EHD spraying

B. T. CHEN, H. C. YEH and N. F. JOHNSON — 83 — Design and use of a virtual impactor and an electrical classifier for generation of test fiber aerosols with narrow size distributions

P. ROTH and A. V. FILIPPOV — 95 — *In situ* ultrafine particle sizing by a combination of pulsed laser heatup and particle thermal emission

G. ROLL, T. KAISER and G. SCHWEIGER — 105 — Optical trap sedimentation cell—a new technique for the sizing of microparticles

J. W. LEE, J. H. GOO and M. K. CHUNG — 119 — Characteristics of inertial deposition in a double bifurcation

T. MARTONEN, Z. ZHANG and Y. YANG — 139 — Particle diffusion with entrance effects in a smooth-walled cylinder

C. P. YU, Y. J. DING, L. ZHANG, G. OBERDÖRSTER, R. W. MAST, D. MAXIM and M. J. UTELL — 151 — A clearance model of refractory ceramic fibers (RCF) in the rat lung including fiber dissolution and breakage

G. PATRICK, A. L. BATCHELOR and C. STIRLING — 161 — Long-term retention of inhaled fused aluminosilicate particles in the trachea and first bifurcation of the rat

News and other items

173 — News Item

174 — Smoluchowski Award (GAeF)

NUMBER 2

J. M. MÄKELÄ, V. JOKINEN, T. MATTILA, A. UKKONEN and J. KESKINEN — 175 Mobility distribution of acetone cluster ions

P. A. LAWLESS — 191 Particle charging bounds, symmetry relations, and an analytic charging rate model for the continuum regime

K. EHARA, C. HAGWOOD and K. J. COAKLEY — 217 Novel method to classify aerosol particles according to their mass-to-charge ratio—aerosol particle mass analyser

R. J. HAN, O. R. MOSS and B. A. WONG — 235 Derivation and application of an analytical solution of the mass transfer equation to the case of forced convective flow around a cylindrical and a spherical particle with fluid surface properties

C. CHO, J. HWANG and M. CHOI — 249 Deposition of polydisperse particles in a Falkner–Skan wedge flow

M. SHAPIRO — 263 An analytical model for aerosol filtration by nonuniform filter media

W. D. GRIFFITHS and F. BOYSAN — 281 Computational fluid dynamics (CFD) and empirical modelling of the performance of a number of cyclone samplers

L. MORAWSKA and M. JAMRISKA — 305 Deposition of radon progeny on indoor surfaces

A. GRAFF, F. OSLENDER and M. QUINTEN — 313 Determination of the layer thickness of submicron coated aerosol particles from optical extinction measurements

P. HOFFMANN, A. N. DEDIK, J. ENSLING, S. WEINBRUCH, S. WEBER, T. SINNER, P. GÜTLICH and H. M. ORTNER — 325 Speciation of iron in atmospheric aerosol samples

Technical notes

K. HÄMERI, P. AALTO, M. KULMALA, E. SAMMALJÄRVI, E. SPRING and P. PIHKALA — 339 Formation of respirable particles during ski waxing

D. KEROUANTON, G. TYMEN and D. BOULAUD — 345 Small particle diffusion penetration of an annular duct compared to other geometries

News items

351 International Aerosol Fellow Award

352 The European Aerosol Assembly (EAA)

353 Smoluchowski Award (GAeF)

ATMOSPHERIC AEROSOLS

H. HORVATH	355	Editorial
S. E. SCHWARTZ	359	The whitehouse effect—shortwave radiative forcing of climate by anthropogenic aerosols: an overview
R. F. PUESCHEL	383	Stratospheric aerosols: formation, properties, effects
S. DESPIAU, S. COUGNENC and F. RESCH	403	Concentrations and size distributions of aerosol particles in coastal zone
H. HORVATH, M. KASAHARA and P. PESAVA	417	The size distribution and composition of the atmospheric aerosol at a rural and nearby urban location
H. HORVATH	437	Spectral extinction coefficients of rural aerosol in southern Italy—a case study of cause and effect of variability of atmospheric aerosol
T. RAUNEMAA, K. KUUSPALO, T. ÅLANDER, A. MIRME and E. TAMM	455	Age estimation of atmospheric black carbon over Finland from combined aerosol size distribution and radon progeny measurements
H. ROHATSCHEK	467	Levitation of stratospheric and mesospheric aerosols by gravito-photophoresis
Regular papers		
G. FRANK, V. KASHPAROV, V. PROTSAK and J. TSCHIERSCH	477	Comparison measurements of a Russian standard aerosol impactor with several western standard aerosol instruments
L. GRADON, S. E. PRATSINIS, A. PODGORSKI, S. J. SCOTT and S. PANDA	487	Modeling retention of inhaled particles in rat lungs including toxic and overloading effects
F. J. MILLER and W. STÖBER	505	Comments on a new, detailed, physiologically based model to describe particle–alveolar macrophage relationships during alveolar clearance of a subchronic lung burden
News item	509	
Announcement	I	

NUMBER 4

Y. ENDO, M. ALONSO, H. ICHITSUBO, T. HASHIMOTO and Y. KOUSAKA	511	Effect of charging and neutralization on the mobility distribution of nanometer-sized aerosol particles
J. W. GENTRY and S. H. CHENG	519	The effect of special classes of collision kernels on the asymptotic behavior of aerosol size distributions undergoing coagulation

L. A. MONDY, A. S. GELLER, D. J. RADER and M. INGBER — 537 Boundary element method calculations of the mobility of nonspherical particles—II. Branched chains and flakes

F. SCHMIDT, H. FISSAN and K. G. SCHMIDT — 547 Transport of submicron particles from a leak to a perpendicular surface in a chamber at reduced pressure

S. SATO, J. H. VINCENT and D. Y. H. PUI — 559 Dispersion of large particles in the near wake of a disc in a turbulent free stream

A. D. MAYNARD — 575 Sampling errors associated with sampling plate-like particles using the Higgins- and Dewell-type personal respirable cyclone

P. J. ZIEMANN, D. B. KITTELSON and P. H. MCMURRY — 587 Effects of particle shape and chemical composition on the electron impact charging properties of submicron inorganic particles

E. CEREDA, G. M. BRAGA MARCAZZAN, M. PEDRETTI, G. W. GRIME and A. BALDACCI — 607 Influence of the elemental composition of individual fly ash particles on the efficiency of the electrostatic precipitators

P. C. S. DEVARA, G. PANDITHURAI, P. E. RAJ and S. SHARMA — 621 Investigations of aerosol optical depth variations using spectroradiometer at an urban station, Pune, India

633 News Report

639 Reply to Comments

645 Abstracts of the 1995 International Conference on Aerosol Science and Technology

663 Book Reviews

NUMBER 5

K. P. KOUTZENOGII, A. I. LEVYKIN and K. K. SABELFELD — 665 Kinetics of aerosol formation in the free molecule regime in presence of condensable vapor

C.-H. LIN and L.-F. W. CHANG — 681 Analytical approach to derive the fine particle dispersion properties inherent in numerical particle trajectory models

J. ROSELL-LLOMPART, I. G. LOSCERTALES, D. BINGHAM and J. FERNÁNDEZ DE LA MORA — 695 Sizing nanoparticles and ions with a short differential mobility analyzer

Y. TIAN and R. E. APFEL — 721 A novel multiple drop levitator for the study of drop arrays

F. SCHMIDT, H. FISSAN and K. G. SCHMIDT — 739 Transport of submicron particles from a leak to a perpendicular surface in a chamber at reduced pressure

C. M. ROMO-KRÖGER and V. DÍAZ — 751 Electrical interactions involved in aerosol filtration by a dielectric porous membrane: the case of nuclepore filter

J. D. WATTERSON and K. W. NICHOLSON — 759 Dry deposition and interception of 4–22 μm diameter particles to a lettuce crop

D. L. FRENCH, D. A. EDWARDS and R. W. NIVEN — 769 The influence of formulation on emission, deaggregation and deposition of dry powders for inhalation

K.-H. CHENG, Y.-S. CHENG, H.-C. YEH, R. A. GUILMETTE, S. Q. SIMPSON, Y.-H. YANG and D. L. SWIFT — 785 *In vivo* measurements of nasal airway dimensions and ultrafine aerosol deposition in the human nasal and oral airways

W. D. GRIFFITHS, I. W. STEWART, A. R. READING and S. J. FUTTER — 803 Effect of aerosolisation, growth phase and residence time in spray and collection fluids on the culturability of cells and spores

821 Abstracts of lectures of the 9th Annual Meeting of the Israeli Association for Aerosol Research

NUMBER 6

FUCHS MEMORIAL ISSUE

M. KULMALA and A. A. LUSHNIKOV — 829 Editorial

831 Fuchs Photographs

K. R. SPURNY — 833 Nikolai Albertowich Fuchs (1895–1982) aerosol scientist and humanist. Memories on the occasion of his 100th birthday

A. A. LUSHNIKOV, M. KULMALA, H. ARSTILA and E. L. ZAPADINSKY — 853 Source enhanced condensation of a single-component vapor in the transition regime

C. F. CLEMENT, M. KULMALA and T. VESALA — 869 Theoretical consideration on sticking probabilities

K. E. J. LEHTINEN, R. S. WINDELER and S. K. FRIEDLANDER — 883 Prediction of nanoparticle size and the onset of dendrite formation using the method of characteristic times

S. DI STASIO, P. MASSOLI and M. LAZZARO 897 Retrieval of soot aggregate morphology from light scattering/extinction measurements in a high-pressure high-temperature environment

A. P. WEBER, U. BALTENSPERGER, H. W. GÄGGELER and A. SCHMIDT-OTT 915 *In situ* characterization and structure modification of agglomerated aerosol particles

SUPPLEMENT 1

ABSTRACTS OF THE 1996 EUROPEAN AEROSOL CONFERENCE

CONTENTS

ATMOSPHERIC AEROSOL

Preface xxvii

Orals—Climate and radiation

The many facets of aerosol science. OTHMAR PREINING S1

Needs for radiation closures concerning atmospheric aerosol. W. VON HOYNINGEN-HUENE S7

The light-scattering aerosol in The Netherlands. H. M. TEN BRINK, C. KRUISZ, G. P. A. KOS and A. BERNER S9

Orals—Urban

Direct radiative forcing by airborne mineral aerosols. I. N. SOKOLIK and O. B. TOON S11

Particle size distributions of atmospheric mercury in urban and rural areas. N. PIRRONE, G. J. KEELER and I. ALLEGRINI S13

Study of urban aerosol particles by XPS and PIXE. A. CLIMENT-FONT, L. GALÁN, E. SWIETLICKI and A. REVUELTA S15

Siberian winter city smog. S. PASHENKO, A. VLASENKO, A. ANKILOV, A. BAKLANOV, S. I. EREMENKO, Y. SHIROKOV, G. P. WYERS, H. M. TEN BRINK, A. KHLYSTOV and A. WAIJERS-YPELAAN S17

Comparison of different measurement methods of airborne dust pollution within the city of Budapest. A. CZITROVSZKY, P. L. CSONKA, P. JANI, Á. RINGELHANN and J. BOBVOS S19

Evaluation of mixing layer depth in Milan town from temporal variation of atmospheric radioactive aerosols. G. M. MARCAZZAN and F. PERSICO S21

Comparison of aerosol measurements in urban environment. A. MIRME and J. RUUSKANEN S23

Orals—Fine

Occurrence of ultrafine particles in association with orographic clouds. W. BIRMILI, A. WIEDENSOHLER and B. YUSKIEWICZ S25

Collection and analysis of condensation nuclei counter measurements in the Arabian Gulf and the Gulf of Oman. A. K. GOROCH S27

Identification of an incinerator plume from ground-level submicrometer aerosol sampling with a micro-orifice impactor. C. B. KIDWELL, F. DUVITA and J. M. ONDOV S29

Importance of fine particle loading to fluxes of trace elements dry depositing onto Lake Michigan. P. F. CAFFREY, A. E. SAUREZ, J. M. ONDOV and M. HAN S31

Orals—General

Activation properties of ambient aerosol in The Netherlands. A. KHLYSTOV, G. P. A. KOS, H. M. TEN BRINK, A. BERNER and C. KRUISZ S33

Human bronchoepithelial cells *in vitro* as a tool for detection of genotoxic activity of airborn particulates. C. HORNBERG, L. MACIULEVICIUTE and N. H. SEEMAYER S35

Degradation of optical properties of solar collectors due to the ambient dust deposition as a function of particle size. S. A. BIRYUKOV S37

The competition between aerosol growth and aerosol nucleation in the atmosphere. C. F. CLEMENT and I. J. FORD S39

Seasonal variation of aerosol particles collected in the upper Rhine Valley. F. FAUDE and J. GOSCHNICK S41

Association between stratospheric aerosols and ridge at 500 mb and Indian summer monsoon. I. JOSHI and M. I. R. TINMAKER S43

Airborne measurements of vertical profiles of aerosols near Spitsbergen 1995/1996. D. NAGEL, S. DEBATIN, H. GERNANDT and A. HERBER S45

Orals—Ambient

Anthropogenic and natural radiatively active aerosol types at Sede Boker, Israel. W. MAENHAUT, R. SALOMONOVIC, J. CAFMEYER, C. ICHOKU, A. KARNIELI and M. O. ANDREAE S47

Detailed mass size distributions of particulate trace elements at Summit, Greenland. W. MAENHAUT, R. HILLAMO, T. MÄKELÄ, J.-L. JAFFREZO, M. H. BERGIN and C. I. DAVIDSON S49

Comparison of recent (1994/1996) black carbon (BC) data with those obtained in 1985 and 1986 in the urban area of Vienna, Austria. R. HITZENBERGER, C. FOHLER-NOREK, U. DUSEK, Z. GALAMBOS and S. SIDLA S51

Volatility measurements of atmospheric aerosols in the mid and south Pacific using a volatility-tandem-differential-mobility-analyzer. D. A. ORSINI and A. WIEDENSOHLER S53

Aerosol composition in western Siberia. P. K. KOUTSENOGII, N. BOUFETOV and R. VAN GRIEKEN S55

Orals—Marine

Dependence of aerosol fluxes and their residence times on different types of sea bottoms. A. ZIELIŃSKI and T. ZIELIŃSKI S57

Evaluation of the aerosol contribution to the nitrogen load to Danish coastal waters 1989–94. O. HERTEL and H. SKOV S59

Numerical simulations of sea spray aerosols. A. M. J. VAN EIJK and B. TRANCHANT S61

Aerosol dynamics over the North Sea in off-shore winds. G. DE LEEUW, A. M. J. VAN EIJK and M. M. MOERMAN S63

Formation and production of sea spray aerosol. D. E. SPIEL and G. DE LEEUW S65

Posters

Efficiency of the inertial wind capture of pesticide aerosols by vegetation species. V. I. MAKAROV, A. N. ANKILOV, K. P. KOUTSENOGII, A. I. BORODULIN and Y. N. SAMSONOV S67

Spatial distribution of aerosol substances according to tropospheric residence time. J. MÜLLER S69

Sampling requirements for estimating fugitive dust emissions. E. VRINS S71

Multispectral radiometric measurements of aerosol optical thickness around the total Solar eclipse of 24 October 1995 over Robertgunj, India. K. K. DANI and P. C. S. DEVARA S73

Evaporation of ammonium nitrate aerosol in DMPS/SMPS. A. KHLYSTOV, H. M. TEN BRINK and A. TOIVONEN S75

An experimental study of the dry deposition mechanism for airborne dust. S. A. BIRYUKOV S77

Investigation of the parameter of aerosol condensation activity in different geographical regions of the former Soviet Union. M. V. PANCHENKO, A. G. TUMAKOV, S. A. TERPUGOVA and E. P. YAUSHEVA S79

The solubility of atmospheric aerosol particles and its impact on cloud microphysics. C. EICHEL, M. KRÄMER, L. SCHÜLTZ and S. WURZLER S81

Quantitative determination of airborne inorganic fibers in the surrounding of the Salonit industrial plant in Anhovo, Slovenia. M. BIZJAK, A. DOVŽAN, I. GRGIĆ, V. HUDNIK, M. KOŠUTA, Z. KRISTANČIČ, C. MARINIČ, M. POJE, K. STANIČ, J. URŠIČ and J. WERDNIK S83

The relative size distributions (RSD) method for revealing aerosol sources. T. PAKKANEN, R. HILLAMO, P. KERONEN, W. MAENHAUT, G. DUCASTEL and J. PACYNA S85

Experimental study of the particulate pollution propagation and of the area of representativity of the atmospheric aerosol spectrum measurements. E. TAMM and M. VANA S87

Frequency distributions of aerosol particulate concentrations. Ü. KIKAS and E. TAMM S89

Elemental composition of rural aerosol collected in Hortobágy National Park, Hungary. I. BORBÉLY-KISS, E. KOLTAY and GY. SZABÓ S91

Applications of the dust diffusion model method in China. F. LIU and Y. HONG S93

Cloud condensation nuclei (CCN) measurements in the urban area of Vienna, Austria. R. HITZENBERGER, H. GIEBL, A. BERNER, R. KROMP, H. PUXBAUM, A. KASPER and D. HUFFMAN S95

Influence of sea spray on HNO_3 fluxes. L. L. S. GEERNAERT, E. VIGNATI, G. DE LEEUW, M. SCHULZ, E. PLATE and J. HØJSTRUP S97

Number concentrations and size distributions of atmospheric aerosol under baseline condition at Cape Grim. A. WIEDENSOHLER and D. S. COVERT S99

The influence of fog and haze events on submicron particle size distributions in the Po Valley region of Northern Italy. B. YUSKIEWICZ, D. ORSINI, F. STRATMAN, A. WIEDENSOHLER and J. HEINTZENBERG S101

Comparative immission measurements of suspended matter in the proximity of a cokery (Zeebrugge-Belgium). W. TROCH and E. ROEKENS S103

The diurnal variation of aerosol chemical composition during the 1995 summer campaign at the Jungfraujoch high-alpine station (3454 m), Switzerland. S. NYEKI, U. BALTENSPERGER and M. SCHWIKOWSKI S105

Influence of wind direction on atmospheric aerosol and gaseous species in Athens, Greece. I. COLBECK and K. ELEFTHERIADIS S107

Analysis of aerosol measurements from the Vindeby experiment. E. VIGNATI, G. DE LEEUW, O. HERTEL and R. BERKOWICZ S109

Ionic composition of atmospheric aerosol and wet deposition in Novosibirsk region. B. S. SMOLYAKOV, L. A. PAVLUIK, K. P. KOUTSENOGII and V. I. MAKAROV S111

Intercomparison of five methods for measuring ambient ammonium aerosol concentrations. M. G. MENNEN and E. M. VAN PUTTEN S113

Comparison of aerosol composition and size distributions at Petten (The Netherlands) and Hohenpeissenberg (southern Germany) for northwesterly and easterly air masses. G. BRUNNEMANN, H. M. TEN BRINK, R. DLUGI, L. KINS and G. P. A. KOS S115

Experimental investigation of altitude dependence of size distribution and concentration of dust particles within the city of Budapest. A. CZITROVSZKY, P. L. CSONKA, P. JANI, Á. RINGELHANN and J. BOBVOS S117

Contents of 3,4-benzo(a)pyrene and dibutyl phthalate in background atmospheric aerosols in west Siberia, and in wind drifted aerosol exhaust out of the chimneys of heat power station. V. I. MAKAROV, Y. N. SAMSONOV, V. V. KOROLEV and V. F. RAPUTA S119

The measurement of aerosol parameters at a high-alpine site in Switzerland—an assessment of results since July 1995. S. NYEKI, U. BALTENSPERGER, D. T. JOST and I. COLBECK S121

Formation of aerosols containing uranium in emissions of plants for nuclear fuel processing. I. I. ZHERIN, A. N. SITNIKOV, S. T. PENIN, YU. N. PONOMAREV and L. K. CHISTYAKOVA S123

Formation of ionic composition of aerosols and precipitations in the Novosibirsk region basing on results of field measurements. B. S. SMOLYAKOV, L. A. PAVLUIK, K. P. KOUTSENOGII, P. K. KOUTSENOGII and V. I. MAKAROV S125

Transformation of fractal atmospheric aerosol moving through natural cave. S. PASHENKO, Y. DUBLYANSKY, V. ANDREICHUK and E. PASHENKO S127

A study of emission sources at Novosibirsk. S. PASHENKO, A. VLASENKO, A. ANKILOV, A. BAKLANOV, S. EREMENKO, V. KOROLEV, Y. SHIROKOV, G. P. WYERS, H. M. TEN BRINK, A. KHLYSTOV and A. WAIJERS-YPELAAN S129

Inverse problems on estimation of parameters of aerosol sources in the atmospheric boundary layer. V. F. RAPUTA, A. I. KRYLOVA and K. P. KOUTSENOGII S131

Spatial distribution of aerosol concentration over industrial regions of Ukraine. V. A. DIACHUK S133

NANO-SIZED MATERIALS

Orals—Measuring

Nanometer differential mobility analyzer (Nano-DMA): experimental evaluation and performance verification. D. HUMMES, S. NEUMANN, H. FISSAN, D. R. CHEN, D. Y. H. PUI, F. R. QUANT and G. J. SEM S135

Nanometer differential mobility analyzer (Nano-DMA): design and numerical modeling. D. R. CHEN, D. Y. H. PUI, D. HUMMES, H. FISSAN, F. R. QUANT and G. J. SEM S137

Development and experimental verification of a new straight forward inversion algorithm for differential mobility analysers. TH. KAUFFELDT, F. STRATMANN and H. KLEINWECHTER S139

Performance of a tandem-differential-mobility-analyzer to study volatile chemical compounds in the particle size range 10–150 nm. D. ORSINI, A. WIEDENSOHLER, F. STRATMANN and D. S. COVERT S141

Theoretical and experimental study of a scanning impactor with rectangular nozzle for submicron particles. TH. KAUFFELDT, C. THILL, D. HÄNEL and A. SCHMIDT-OTT S143

An experimental study of the thermal rebound effect of nanometer aerosol particles. A. S. SKAPTSOV, A. M. BAKLANOV, S. N. DUBTSOV, N. S. LAULAINEN, G. SEM and S. KAUFMAN S145

Orals—Production

Formation of nano-sized water droplets in a supersonic expansion flow. B. PRAST, R. A. VAN DAM, J. F. H. WILLEMS and M. E. H. VAN DONGEN S147

Characterization of thin film produced by quantum dot deposition process. S. AONO, M. ITOH, H. TAKANO and S. TOHNO S149

Electrostatic precipitator for homogeneous deposition of ultrafine particles to create quantum-dot structures. K. DEPPERT, F. SCHMIDT, T. KRINKE, J. DIXKENS and H. FISSAN S151

Flame synthesis of nanosize particles: precise control of particle size. S. E. PRATSINIS S153

Preparation of nano size particles. B. RAGHUNATH, P. D. SAWANT, M. P. CHOUGOANKAR, P. V. N. NAIR and C. MANOHAR S155

Preparation of fine particles by CO_2 laser assisted decomposition of tetraethylorthosilicate vapour. P. MORAVEC, J. SMOLÍK, V. DŘÍNEK and V. V. LEVDANSKY S157

Orals—Separation

Separation of fine particles in packed columns. S. HEIDENREICH, H. BÜTTNER and F. EBERT S159

Evidence for size dependent reformation of nanoparticles. J. PAUL, CH. HUEGLIN, H. BURTSCHER, K. SIEGMANN and H. C. SIEGMANN S161

Posters

Determination of the size distribution of nanometer-sized particles. D. HUMMES, S. NEUMANN, F. SCHMIDT, M. DRÖTBOOM, H. FISSAN, K. DEPPERT, T. JUNNO, J.-O. MALM and L. SAMUELSON S163

Synthesis of semiconducting nanoparticles. F. E. KRUIS, A. GOOSSENS and H. FISSAN S165

Measurement of ultrafine aerosol particles size below 15 nm by a diffusion battery (DB). A. S. SKAPTSOV, A. M. BAKLANOV, S. N. DUBTSOV, N. S. LAULAINEN, G. SEM and S. KAUFMAN S167

Determination of DMA transfer functions using identical instruments in series. W. BIRMILI, F. STRATMANN, A. WIEDENSOHLER, D. COVERT, L. M. RUSSELL and O. BERG S169

On-line measurement and characterization of single particles using laser mass spectrometry and multivariate data analysis. K.-P. HINZ, R. KAUFMANN and B. SPENGLER S171

Imaging of ultrafine particles with the atomic force microscope. T. JUNNO, S. ANAND, K. DEPPERT, L. MONTELIUS and L. SAMUELSON S173

ELECTRICAL EFFECTS

Orals—Electrohydrodynamic atomization

The role of liquid viscosity and electrical conductivity on the motions inside Taylor cones in E.H.D. spraying of liquids. A. BARRERO, A. M. GAÑAN-CALVO and R. FERNANDEZ-FERIA S175

Development of electrohydrodynamic sprays related to space charge effects. R. P. A. HARTMAN, J.-P. BORRA, J. C. M. MARIJNISSEN and B. SCARLETT S177

A global model for the electrospraying of liquids in steady cone-jet mode. A. M. GAÑAN-CALVO and A. BARRERO S179

New aerosol generator based on the mixing of droplets through electrical forces: production of particles with controlled properties. J.-P. BORRA, D. CAMELOT, J. C. M. MARIJNISSEN and B. SCARLETT S181

Non-linear deformation and breakup of charged capillary jets. J. LOPEZ-HERRERA, A. M. GAÑAN-CALVO and M. PEREZ-SABORID S183

High pressure assisted electrostatic atomization of liquid metals. M. LOHMANN, H. KIRSCH and A. SCHMIDT-OTT S185

The equilibrium shapes of liquid menisci emitting liquid and charges in steady cone-jet mode. A. M. GAÑAN-CALVO, C. PANTANO and A. BARRERO S187

Orals—Mechanism

Investigation of particle separation using photoelectric charging. M. MOHR and H. BURTSCHER S189

The motion of radioactive aerosol in electric fields. C. F. CLEMENT and R. G. HARRISON S191

On-line mobility analyzer: calculation of the particle motion. D. FRANKEN and U. SIEVERT S193

Transport of unipolarly charged aerosols accelerated by an electric field. E. OTTO, M. DROETBOOM and H. FISSAN S195

Combined field-diffusion charging of aerosol particles. A. V. FILIPPOV S197

Effects of particle space charge density and turbulent diffusivity on the performance of plate–plate electrostatic precipitators. S. J. PARK and S. S. KIM S199

The size dependent charging of iron fibers. S.-H. CHENG, J.-C. LIN and J. W. GENTRY S201

Posters

Destabilisation of sprays in the cone-jet mode by electrical discharges on the jet. J.-P. BORRA, R. HARTMANN, J. MARIJNISSEN and B. SCARLETT S203

Mathematical model for charged particle measurement. M. MACHIDA, J. C. M. MARIJNISSEN and B. SCARLETT S205

The effect of acetone vapour on charging properties of 6–20 nm silver particles. J. M. MÄKELÄ, V. JOKINEN, J. AUGUSTIN, J. KESKINEN and G. P. REISCHL S207

Influence of electrode material on the electrocoagulation. V. YU. BAKLAN and I. P. KOLESNIKOVA S209

Diffusion charging of water droplets in the atmosphere. L. T. CHERNYI, G. L. SEDOVA and N. L. VASIL'EVA S211

Particle resuspension in the high gradient alternating electric field. S. A. BIRYUKOV S213

The supercritical nature of electrohydrodynamically driven, capillary microjets emitted in the EHD spraying of liquids. A. M. GAÑAN-CALVO and A. BARRERO S215

Preparation and evaluation of aerosol composite particles by electrostatic process. Y. TAKAO, M. AWANO and Y. KUWAHARA S217

Productivity of an electric mobility classifier. H. TAMMET S219

Photoemissional charging of airdispersed systems. L. A. LYALIN and A. V. SUSLOV S221

Method of calculation of the size spectrum of aerosol particles according to their mobility spectrum. U. HÕRRAK, J. SALM and H. TAMMET S223

BIO-AEROSOLS

Orals

Bio-aerosols and electric fields, an introduction. R. A. ROOS S225

Pollen: bio-indicator of pollution. M. TH. CERCEAU-LARRIVAL, C. BOCQUEL, M. C. CARBONNIER-JARREAU and A. M. VERHILLE S227

Surface and depth analysis of pollen treated with atmospheric trace gases. J. GOSCHNICK and J. SCHURICHT S229

Protein nebulization. I. FÄNGMARK and J. C. CARPIN S231

Aerosol formation potential of biogenic hydrocarbons. T. HOFFMANN, J. ODUM, F. BOWMAN, D. COLLINS, D. KLOCKOW, R. C. FLAGAN and J. H. SEINFELD S233

The development of sampling methods for the assessment of indoor bioaerosols. W. D. GRIFFITHS, I. W. STEWART, S. J. FUTTER, S. L. UPTON and D. MARK S235

Posters

A new attrition test for granules containing bio materials. W. J. BEEKMAN, G. M. H. MEESTERS and B. SCARLETT S237

Theoretical foundations of optimal aerosol technology in plant protection—Part 2. Flying insects. K. P. KOUTZENOGII S239

Theoretical foundations of optimal aerosol technology in plant protection—Part 3. Crawling insects. K. P. KOUTZENOGII S241

Pollen component of Siberian biogenic atmospheric aerosol. V. V. GOLOVKO, P. K. KOUTSENOGII, E. I. KIROV and K. P. KOUTSENOGII S243

On simulation of biological aerosol particles distribution in turbulent atmosphere and its applications. G. M. TEPTIN and P. N. DOURIAGUINE S245

Collection of airborne microorganisms: advantages and disadvantages of different methods. S. A. GRINSHPUN, K. WILLEKE, V. ULEVICIUS, J. DONNELLY, X. LIN and G. MAINELIS S247

Development and evaluation of aerosol generators for biological materials. K. WILLEKE, V. ULEVICIUS, T. REPONEN and S. A. GRINSHPUN S249

Pollen grains as a cause of pollinosis. N. MEYER-MELIKIAN, E. SEVEROVA and S. POLEVOVA S251

Emission of bacterial aerosol from the fish aquarium. J. S. PASTUSZKA, R. L. GÓRNY and D. O. LIS S253

Collection and adhesion efficiency of biological particles on single fibers. R. MAUS and H. UMHAUER S255

FUNDAMENTALS

Posters

The homogeneous nucleation kinetics near a small evaporating drop. S. P. FISENKO S257

Theoretical foundations of optimal aerosol technology in protection of plants—Part I. General principles. K. P. KOUTZENOGII S259

Diffusion of aerosols with in-flight formation in laminar tube flow. J. MALET, N. MONTASSIER, D. BOULAUD and A. RENOUX S261

The collision rate of particles in turbulent media. F. E. KRUIS and K. A. KUSTERS S263

About the relation between the number of aerosol clusters and their size distribution. V. V. RYAZANOV and S. G. SHPYRKO S265

Stability of free shear flows of the two-phase fluids. V. YA. RUDYAK, E. G. BORD and E. B. ISAKOV S267

Kinetic equations of gas suspensions. V. YA. RUDYAK and I. V. ERSHOV S269

Classification principles of dispersed media. V. YA. RUDYAK S271

Simultaneous condensation of five gaseous substances. T. MATTILA, M. KULMALA and T. VESALA S273

Stability of motion of spheroidal particles in a simple shear flow. D. BRODAY, M. SHAPIRO, M. FICHMAN and C. GUTFINGER S275

Stationary distribution function of the size of coagulating clusters in the self-matching storage model. V. V. RYAZANOV and S. G. SHPYRKO S277

On the effect of volatility on thermophoresis of aerosols. S. P. BAKANOV S279

Coagulation of noncompletely coalescing particles. A. A. LUSHNIKOV S281

On the theory of dispersion of drops in aerosol jet. S. K. ASLANOV S283

Deformation of aerosol particle size distribution under the condition of laminar movement through a flat channel with temperature variation. E. A. CHERNOVA S285

Water drops collisions with the water flat surface. S. L. ZHBANKOVA and A. V. KOLPAKOV S287

INSTRUMENTATION

Orals—Optical

On-line chemical analysis of single aerosol particles. M. WEISS, P. J. T. VERHEIJEN, J. C. M. MARIJNISSEN and B. SCARLETT S289

Detection of microparticles by laser-induced vaporization and ionization. E. BINDER and R. WURSTER S291

Improved detection limits of linear Raman-spectroscopy on aerosols. R. VEHRING, B. XU and G. SCHWEIGER S293

Raman spectroscopy as an on-line measurement technique in a laser-CVD reactor during production of Si_3N_4. I. L. TUINMAN, J. VEENSTRA, J. C. M. MARIJNISSEN, B. SCARLETT and J. SCHOONMAN S295

Orals—General

The development of a circular slit inertial classifier. N. C. LIU, J. O'CONNELL and J. W. GENTRY S297

Real time measurement of the size distribution of urban air aerosols with electrical low pressure impactor. A. LAITINEN, J. HAUTANEN, J. KESKINEN, M. MOISIO, M. MARJAMÄKI, A. ELSILÄ and K. NIEMINEN S299

Calibration method for cascade impactors. J. KESKINEN, M. MARJAMÄKI, T. MÄKELÄ and R. HILLAMO S301

Modification and calibration of a TSI 7610 condensation particle counter for high altitude airborne measurements. M. HERMANN and A. WIEDENSOHLER S303

A gas fluidization dustiness tester. S. A. SETHI and T. SCHNEIDER S305

On the radial flow differential mobility analyzers for the determination of aerosol particle density and mass. D. BOULAUD, M. POURPRIX, R. GOUGEON, E. LE BRONEC and A. RENOUX S307

Orals—Applied

Sampling and characterization of organic liquid submicrometer aerosols from finish emissions. J. MAHY, P. WESSELS and R. W. M. JANSEN S309

Description and application of a dilution method for the characterization of particles from emission sources. CH. HUEGLIN, L. SCHERRER and H. BURTSCHER S311

The deliquescent growth of inorganic-salt aerosols observed by a combined system of TDMA and integrated nephelometer. W.-M. GRACE LEE, C.-Y. CHEN, S.-L. HUANG and C.-T. LEE S313

Posters

Quasi-millikan method for absolute size measurement of monodisperse particles. K. EHARA and M. KOIKE S315

A test device for quick ranking of soil erodibility. W. HOLLÄNDER, K. H. JUNKER and V. MIRONOV S317

Modelling of nicotine diffusion from mainstream tobacco smoke within denuder tubes. D. A. LEWIS and I. COLBECK S319

Application of travelling wave field technique to classify polydispersed powder particles into size fractions. W. MACHOWSKI and W. BALACHANDRAN S321

Raman thermometry of aqueous multicomponent aerosol particles. R. VEHRING and G. SCHWEIGER S323

A new phase method of measuring particle's size with laser Doppler system. V. M. ZEMLIANSKII S325

An automatic monitor for acidity and neutralization of test aerosols. E. KARG and S. SCHACHTL S327

Temperature distribution on the impactor plate at low pressure. T. RAUNEMAA, N. JOUBERT, K. KUUSPALO and P. K. HOPKE S329

The use of a confocal-laser-scanning-microscope to determine the 3-dimensional shape of fiber aggregates. R. SCHMIDT and M. BOTTLINGER S331

Uranium detection in aerosol particles on emission spectra of a laser plasma. S333
S. T. PENIN and L. K. CHISTYAKOVA

Study of end-of-pipe filtering efficiencies for submicrometer liquid aerosols. S335
P. WESSELS and J. MAHY

Performance of the counting efficiency of the TSI-3025 UCPC, the TSI-3010 CPC, and the TSI-3760/7610 CPC for different operating conditions. A. WIEDENSOHLER, D. ORSINI, D. S. COVERT, D. COFFMANN, W. CANTRELL, M. HAVLICEK, F. BRECHTEL, L. RUSSEL, R. J. WEBER, J. GRAS, J. G. HUDSON and M. LITCHY S337

A new data inversion algorithm for DMPS-measurements. F. STRATMANN and A. WIEDENSOHLER S339

Real measurement of a flow profile in a small tube. U. SIEVERT S341

Inverse problem in analysis of the diffusion battery data. V. A. ZAGAYNOV S343

STANDARDS AND REFERENCES

Field measurements of combustion aerosols from co-firing of coal and straw. L. B. NIELSEN, L. S. JENSEN, C. PEDERSEN, M. RØKKE and H. LIVBJERG S365

A laboratory study of aerosol formation and sulphation in a synthetic flue gas containing K, Cl and S. L. B. NIELSEN and H. LIVBJERG S367

Poster

Investigation of monodispersed metal particles' combustion in the air. A. V. SUSLOV S369

PRODUCTION

Orals

Photopolymerization reactions in aerosols: a simple method to the synthesis of monodisperse microspheres. C. ESEN, T. KAISER and G. SCHWEIGER S371

Aerosol dynamics during aerosol decomposition synthesis of metal ruthenate powders. P. AHONEN, A. S. GURAV, E. I. KAUPPINEN, M. J. HAMPDEN-SMITH and T. T. KODAS S373

Control of particle morphology and homogeneity during spray pyrolysis. J.-C. LIN and J. W. GENTRY S375

Laser induced aerosols. A. A. LUSHNIKOV S377

Size distribution of liquid flame spray generated ceramic powders. J. TIKKANEN, K. A. GROSS, J. KESKINEN and V. PITKÄNEN S379

Evaporation of aerosols produced with eleven jet nebulizers. G. A. FERRON, B. BUSCH, J. GEBHART and C. ROTH S381

Posters

Role of boundaries in dispersing of moving media: similarity number. YU. I. BOYKO and N. KH. KOPYT S383

Water nucleation on aerosol particles containing surface-active agents. B. GORBUNOV and R. HAMILTON S385

Characterization of the aerosols generated by a new microwave thermal nebulizer. L. BORDERA, J. L. TODOLÍ, J. MORA, A. CANALS and V. HERNANDIS S387

A model of hollow particle production by a sol-gel process. I. J. FORD S389

Kinetics of formation and properties of laser induced aerogels. A. A. LUSHNIKOV and A. E. NEGIN S391

Ultrasonic generation of droplets for the production of fluorescein aerosol of mass median aerodynamic diameter between 1 and 10 μm and geometric standard deviation <1.5. D. BEMER and P. TIERCE S393

Preparation of fine particles by spray pyrolysis. I. COLBECK and Y. KAMLAG S395

Generation of (ultra)fine carbonaceous particle aerosols. S. M. SPOOR, J. H. E. ARTS and H. MUIJSER S397

Charge and size distribution of medical aerosols. W. KALLER and H. HORVATH S399

Performance of the photochemical aerosol generator at 2–10 nm. S. N. DUBTSOV, A. M. BAKLANOV, J. M. MÄKELÄ and J. AUGUSTIN S401

Production of metal oxide particles using the spray pyrolysis process. D. CAMELOT, J. C. M. MARIJNISSEN and B. SCARLETT S403

Experimental study of the aerosol formation by hydrolysis of UF_6 in gaseous phase under atmospheric conditions. I. I. ZHERIN, S. T. PENIN, L. K. CHISTYAKOVA and V. I. KOKHANOV S405

PHYSICS

Orals

A comparison of thermophoresis in a laminar flow under gravity and microgravity conditions. W. OOSTRA, D. BRYANT, J. C. M. MARIJNISSEN, B. SCARLETT and F. STRATMANN S407

Distribution of aerosols in thermal boundary layers. P. L. GARCÍA-YBARRA and J. L. CASTILLO S409

Attachment of vapor molecules to cluster and droplet surfaces. P. E. WAGNER S411

Interaction between different sized particles during acoustic agglomeration of oil droplets. PH. CAPÉRAN, J. SOMERS and K. RICHTER S413

Particle resuspension: time dependence, deagglomeration. S. A. BIRYUKOV S415

Determination of equivalent diameters of agglomerates. R. LANGE, H. FISSAN and A. SCHMIDT-OTT S417

Posters

Experimental study of a two-phase two-component critical flow in a converging-diverging nozzle. K. JURSKI, E. GÉHIN, M. DEGERATU and G. PIAR S419

Generation of fine aerosol at 'claviform' and 'bag' types of liquid drop breakup. A. G. GIRIN and E. A. IVANCHENKO S421

Electrothermal oscillation instability in spherical aerosols particle. N. N. BELOV, G. V. BELOKOPYTOV and M. V. JOURAVLEV S423

The break-up of extension jet. I. I. VISHNEVETSKIY, A. V. KOLPAKOV, S. L. ZHBANKOVA and L. V. MALIAROVA S425

Particle removal from semiconductor wafers by megasonic cleaning. T. H. KUEHN, D. B. KITTELSON, Y. WU and R. GOUK S427

Isobaric nucleation of a glycerin—SF_6 system. M. P. ANISIMOV, A. G. NASIBULIN, S. D. SHANDAKOV and L. TIMOSHINA S429

Critical embryos of a glycerin—SF_6 system near a melting point. M. P. ANISIMOV, A. G. NASIBULIN, S. D. SHANDAKOV and L. TIMOSHINA S431

The investigation of homogeneous nucleation rate dependence upon carrier-gas influence. V. B. MIKHEEV, G. G. KODENEV, A. T. NEKIPELOV and N. S. LAULAINEN S433

Charge distribution on aerosol particles under photon irradiation. S435
O. A. MIKHALKOVA and P. P. POLUEKTOV

INDOOR

Orals

Characteristics of particle emissions at paint manufacturing. M. SPANNE, S437
B. O. OLSSON, A. GUDMUNDSSON and M. BOHGARD

Particle size distributions of radioactive aerosols measured in the workplace and S439
the environment. M.-D. DORRIAN and M. R. BAILEY

Resuspension of an indoor aerosol. E. KARLSSON, I. FÄNGMARK and T. BERGLUND S441

Indoor sources of airborne particulate matter in a museum and its impact on S443
works of art. H. ROSHANAEI and D. A. BRAATEN

Posters

On the nature of small indoor air ions. T.-E. PARTS S445

Size distributions of ionic species in ambient aerosols in SE England. S447
M.-C. CHUNG and I. COLBECK

Ambient aerosol concentrations at a site in SE England during bonfire night 1995. S449
I. COLBECK and M.-C. CHUNG

Ecochemical and ecotoxicological problems in the production of selenium current S451
rectifiers. E. COHEN, K. KULKINA and L. NIKOLOVA

NUCLEAR

Orals

Study of aerosol deposition in large pipes: TRANSAT programme. E. VERLOO, S453
S. BELVAL, V. SALDO, T. ALBIOL and F. SABATHIER

Analysis of models for turbulent deposition of aerosols. H. W. CHIANG, S455
S. R. MULPURU and C. J. BERKIS

Aerosol deposit characterization by radiation technology. R. HUMMEL, S457
A. HAUTOJAERVI, A. KRASENBRINK, M. VALISI and G. DE SANTI

On the modelling capabilities to simulate aerosol behaviour in the PHEBUS-FP S459
containment: lessons learned from FPT0 test. E. HONTAÑÓN, J. POLO and
L. E. HERRANZ

Revent program: experimental determination of aerosol reentrainment from S461
flashing pool during controlled filtered venting of the containment after a severe
core melt accident. M. MÜLLER and P. R. VON ROHR

Steam condensation onto hygroscopic aerosols: validation of contain model. S463
E. HONTAÑÓN and L. E. HERRANZ

Posters

Measurements of unattached fraction of radon progeny with two different S465
methods. P. T. WASIOLEK, A. C. JAMES and F. YARGER

Size distribution of aerosols released from heated LWR fuel rods. A. CZITROVSZKY, J. FRECSKA, P. JANI, L. MATUS and A. NAGY S467

Experimental studies on LWR containment aerosol behaviour at VICTORIA facility. J. MÄKYNEN, J. JOKINIEMI, P. AHONEN, E. KAUPPINEN, H. TUOMISTO and T. ROUTAMO S469

Analysis of dominant phenomena during aerosol scrubbing in saturated pools. V. PEYRES and L. E. HERRANZ S471

HEALTH

Orals

Aerosol air pollution: its chemistry and size dependent health effects. K. R. SPURNY S473

Physico-chemical monitoring of the toxicity of fibrous mineral dusts. K. R. SPURNY S475

Aerosol photoemission and genotoxicity. R. WASSERKORT and H. BURTSCHER S477

Theoretical and experimental study of fibrous aerosol particles deposition in a granular bed. A. PODGÓRSKI, Y. ZHOU, H. BIBO and J. MARIJNISSEN S479

Deposition and clearance of inhaled particles in the human nasal passage. M.-D. DORRIAN, J. R. H. SMITH, M. J. YOUNGMAN, M. R. BAILEY, G. ETHERINGTON and A. L. SHUTT S481

Study on the aerosol transmission of Hantaan virus. F. CHE, Y. TONG, J. LU, L. MENG, J. LI, J. LI, C. ZHANG, S. ZHANG, Q. HU and M. LUI S483

Dustiness from powder materials. K. HJEMSTED and T. SCHNEIDER S485

Posters

Influence of particle size on efficiency deposition of aerosol on larvae gypsy moth. K. P. KOUTSENOGII, O. V. CHANKINA, E. I. KIROV, V. I. MAKAROV, V. M. SAKHAROV and G. N. ZAGULYAEV S487

Quantitative characterization of localized inhomogeneities of aerosol deposition patterns within airway bifurcations. I. BALÁSHÁZY, W. HOFMANN and T. HEISTRACHER S489

Deposition model for fibers in the deep parts of the lung. Y. ZHOU, A. PODGORSKI, J. C. M. MARIJNISSEN, S. M. LEMKOWTZ and H. B. BIBO S491

Aerosol from hot cooking oil, a possible health hazard. K. SIEGMANN and K. SATTLER S493

Aerosol bolus dispersion in the human lung. R. BERGMANN, W. HOFMANN and L. KOBLINGER S495

Supercritical CO_2-assisted nebulization for the production and administration of drugs. R. E. SIEVERS, U. KARST, J. D. SCHAEFER, C. R. STOLDT and B. A. WATKINS S497

Personal exposure study of cyclists to airborne particulate matter in London. B. SITZMANN, M. KENDALL, J. WATT and I. WILLIAMS S499

Behavior of hydrophilic and hydrophobic particles at the monolayer of alveolar surfactant—a model study. T. R. SOSNOWSKI and L. GRADOŃ S501

OPTICAL

Orals

The legacy of John Tyndall in aerosol science. J. W. GENTRY and J.-C. LIN S503

Detection of microparticles by electron scattering. R. ZWIEBEL and R. WURSTER S505

Resuspension of particles: measurements of kinematic properties. H. BULTYNCK, G. GRÉHAN, G. GOUESBET and D. BOULAUD S507

Investigations of ammonium salt aerosols by means of optical levitation and elastical/inelastical light scattering. M. TRUNK, J. POPP, J. MUSICK and W. KIEFER S509

Evaporative losses of ammonium nitrate in nephelometry and impactor measurements. P. G. DOUGLE and H. M. TEN BRINK S511

Humidity dependence of the light scattering by mixtures of ammonium nitrate, ammonium sulfate and soot. P. G. DOUGLE, A. L. VLASENKO, J. P. VEEFKIND and H. M. TEN BRINK S513

Carbonaceous aerosols from diesel fuel pyrolysis in shock tube. J. D'ALESSIO, M. LAZZARO and P. MASSOLI S515

Investigation of the desorption of acetylene from acetone microdroplets by Raman spectroscopy. H. MORITZ, R. VEHRING and G. SCHWEIGER S517

Investigation of coated droplets by optical levitation. T. KAISER, G. ROLL and G. SCHWEIGER S519

Spectral variation of aerosol optical depth over an Indian urban station during the winter 1995–96. R. S. MAHESKUMAR, P. C. S. DEVARA, G. PANDITHURAI, P. E. RAJ and K. K. DANI S521

A laser monitor for the fiber deposition in a lung model. J. MARIJNISSEN, P. LILIENFELD and Y. ZHOU S523

Characterization of airborne mineral fibers by evaluation of the azimuthal light scattering pattern: experimental results in diameter and length classification. H. BARTHEL, B. SACHWEH, H. BÜTTNER and F. EBERT S525

Experimental determination of polarized light scattering by irregular particles. H. VOLTEN, J. F. DE HAAN, W. VASSEN, K. LUMME and J. W. HOVENIER S527

Experimental determination of light diffusion coefficients in optically dense aerosols. W. W. SZYMANSKI S529

Aerosol particle size determination using a photon correlation laser Doppler anemometer. P. JANI, A. NAGY and A. CZITROVSZKY S531

Particle size determination in absorbing aerosols by photon correlation spectroscopy. R. WEBER and G. SCHWEIGER S533

Photon correlation spectroscopy for analysis of low concentration submicrometer samples. A. W. WILLEMSE, J. C. M. MARIJNISSEN, R. ROOS, A. VAN WUYCKHUYSE and B. SCARLETT S535

Posters

Optical behavior of fine bubbles—possibility of real time size characterization. W. W. SZYMANSKI S537

Particles evaporation, mobility and photon correlation measurements. V. I. JAKIMCHUK and N. KH. KOPYT S539

Method of cumulants in photon-correlation spectroscopy. V. I. JAKIMCHUK S541

Analysis of coated microparticles by Raman confocal microprobing. M. A. BORCHERS, C. ESEN, R. VEHRING and G. SCHWEIGER S543

FSSP sizing tests using monodisperse water drops. A. KEIL and M. WENDISCH S545

Influence of resonance radiation on the force acting on aerosol particles. V. V. LEVDANSKY S547

Aerosol measurements by unconventional Lidar techniques. A. D. YEGOROV, A. A. SINKEVICH and V. D. STEPANENKO S549

Interaction of long wavelength photons with fractal aggregates. B. S. GALYAMOV, A. A. LUSHNIKOV, V. V. MAXIMENKO, A. E. NEGIN and M. YU. YABLOKOV S551

A theoretical evaluation of the radiative properties of ammonium sulfate and caffeine aerosols at 632 nm. M. PEÑALOZA and I. COLBECK S553

The ultrafine metallic particles sizing in the range of "size effect" from the extinction spectra of radiation. A. F. SINYUK and S. L. OSHCHEPKOV S555

Phase function of atmospheric background aerosol at large scattering angles. A. A. KOKHANOVSKY S557

Control of disactivation processes by using a new laser bubble sizer. E. P. EMETS, G. YU. KOLOMEYTSEV, P. P. POLUEKTOV and V. V. TIMONIN S559

Polymerization and copolymerization reaction observed in optically levitated aerosol particles. J. MUSICK, J. POPP, M. TRUNK and W. KIEFER S561

Test of gamma function as particle size distribution using radiance data. M. KOCIFAJ and J. LUKÁČ S563

Effects of nonsphericity on Saharan dust optical properties. K. WENZEL, W. VON HOYNINGEN-HUENE and S. SCHIENBEIN S565

New method for retrieval of particle size distributions from combined data of spectral extinction and aureole scattering. P. POSSE and W. VON HOYNINGEN-HUENE S567

Extinction coefficient of submicron sized Me and Me_xO_y aerosol particles (Me = Ag, Au, Cu, Al, Fe, Sn). M. QUINTEN S569

Optical and structural characterization of metallic aerosol particles with metal-oxide shell of variable thickness. M. QUINTEN S571

Application of a three-wavelength extinction meter within the storm experimental programme. R. HUMMEL, A. KRASENBRINK, M. VALISI, S. SCHWAB, F. SCHAETTGEN and G. DE SANTI S573

The peculiarities of visible light scattering by nonspherical aerosol particles. A. G. PETRUSHIN S575

Determination of on-line particle size and concentration for sub-micron particles at low concentrations. A. L. VAN WUYCKHUYSE, A. W. WILLEMSE, J. C. M. MARIJNISSEN and B. SCARLETT S577

Photoemission detecting the melting point of small aerosol particles. J. PAUL, CH. HUEGLIN, H. BURTSCHER, K. SIEGMANN and H. C. SIEGMANN S579

Real time detection of biological aerosols with fluorescence aerodynamic particle sizer (FLAPS). J. HO S581

MODELLING

Orals

A lognormal model for the size-resolved treatment of particle dynamics and liquid-phase chemistry. M. WILCK and F. STRATMANN S583

Sedimentation of spheroidal particles in a vertical shear flow near a wall. E. GAVZE and M. SHAPIRO S585

Experimental and theoretical examination of homogeneous nucleation in a laminar flow reactor (UCPC). M. WILCK, K. HÄMERI, F. STRATMANN and M. KULMALA S587

Posters

Solution of inversion problem adapted to multi-jet–multi-stage impactors VITIS-I code. M. DIOURI and I. S. SANDA S589

Nucleation and thermo-hydrodynamic instabilities of condensing phase on mixed aerosol particles. V. YE. SMORODIN S591

Application of a multivariate chemical balance method to Milan aerosol, fog and wet deposition data. M. MAUGERI and A. NOVO S593

Turbulent diffusion of inertial sedimentating aerosol particles. A. S. STEPANOV S595

Mathematical modelling of aerosols evolution and sedimentation in the atmosphere of big cities. N. N. SMIRNOV, V. F. NIKITIN and J. C. LEGROS S597

Computer modelling of polydisperse aerosol transport with LDA-measured kinematics properties. A. I. STRUCHAYEV S599

A stochastic model of particle reentrainment-deposition in turbulent boundary layers. D. A. BRAATEN and K. T. PAW U S601

Transit time distribution of aerosols in 3-D lung bifurcations. T. HEISTRACHER, W. HOFMANN and I. BALÁSHÁZY S603

A new cell model in gas filtration theory. W. ZIEMER and B. FOERSTER S605

Calculation of aerosol jet flows. SH. F. ARASLANOV, O. M. KISELEV and SH. KH. ZARIPOV S607

About physical model of natural purification of the atmosphere from highly dispersed aerosol pollution. K. M. MERZHANOV S609

FILTRATION

Orals

Conditions effecting the degradation of an electrically active filter material. D. C. WALSH and J. I. T. STENHOUSE S611

Highly efficient filtering materials. T. CIACH and L. GRADOŃ S613

The process of nonsteady-state filtration in non woven filtering materials. P. GRZYBOWSKI and L. GRADOŃ S615

The effect of solid and liquid aerosol particle loading on fibrous filter material performance. D. C. WALSH, J. I. T. STENHOUSE, K. L. SCURRAH and A. GRAEF S617

Bioaerosol filtration efficiency of clean HVAC filters and shedding of micro-organisms from filters loaded with outdoor air. A. GINESTET, S. MANN, S. PARAT, S. LAPLANCHE, J. H. SALAZAR, D. PUGNET, S. EHRLER and A. PERDRIX S619

Acoustic agglomeration for electrostatic retention of fly-ashes at pilot scale: influence of intensity of sound field at different conditions. J. J. RODRÍGUEZ-MAROTO, F. J. GOMEZ-MORENO, M. MARTÍN-ESPIGARES, A. BAHILLO, M. ACHA, J. A. GALLEGO, E. RIERA, T. L. HOFFMANN and G. RODRÍGUEZ S621

Inertial separation of nano-size particles from supersonic flow field. C. KANAOKA and M. FURUUCHI S623

Comparison of classical and contemporary methods for prediction of fibrous filter efficiency using computational fluid dynamics (CFD). D. P. MORTIMER, I. POTTS and T. H. FROST S625

Numerical simulation of particle deposition in filters. O. FILIPPOVA and D. HÄNEL S627

PolyHIPE foams: production, characterisation and performance as aerosol filtration materials. D. C. WALSH, J. I. T. STENHOUSE, L. P. KINGSBURY and E. J. WEBSTER S629

Posters

PostCyclone (PoC): an approach to a better efficiency of dustcyclones. A. PLOMP, M. I. L. BEUMER and A. HOFFMANN S631

Development of a realistic loading aerosol for cabin air filter testing. O. KIEVIT, V. NEVELING, J. VALKENBURG and J. WAQUÉ S633

Development of a polystyrene microsphere aerosol challenge for HEPA and ULPA filters. G. GESCHWIND, S. D. DUKE and D. MILHOLLAND S635

Experimental study on the collection efficiency of membrane filters. N. MONTASSIER, L. DUPIN and D. BOULAUD S637

Pressure drop across fiber filters. E. WEINGARTNER, P. HALLER, H. BURTSCHER and U. BALTENSPERGER S639

Theoretical and experimental studies of fibrous filters coupled with external electrical field. H. J. LUCKNER, L. GRADOŃ, A. PODGÓRSKI and Z. WERTEJUK S641

Study of electrostatic precipitator efficiency as function of the electrical field intensity and particle properties in a pilot coal combustion plant. J. J. RODRÍGUEZ-MAROTO, F. J. GOMEZ-MORENO, M. MARTIN-ESPIGARES, A. BAHILLO and M. ACHA S643

On application of highly dispersed water aerosol for filtration of smoke gases. V. A. SALOV and N. KH. KOPYT S645

CHEMICAL

Orals

Chemical classification of aerosol particles. H. KIRSCH, W. FENDEL and A. SCHMIDT-OTT S647

Characterisation of aerosol particles near Krasnoyarsk, Central Siberia. S. HOORNAERT, R. VAN GRIEKEN and K. P. KOUTSENOGII S649

Chemical reactions on aerosol particle surfaces: concept and methods. U. BALTENSPERGER, M. AMMANN, M. KALBERER and H. W. GÄGGELER S651

Temperature dependence of the redistribution mechanisms for volatile components of atmospheric aerosol particles. H. BUNZ, M. KOYRO, O. MÖHLER and H. SAATHOFF S653

Solubilities and reactions of trace gases in cold sulfuric acid aerosols. S. LANGENBERG, V. PROKSCH and U. SCHURATH S655

The role of atmospheric aerosols in SO_2 oxidation: catalytic effect of iron in the presence of organic ligands. I. GRGIĆ, A. DOVŽAN and V. HUDNIK S657

Reactivity of ambient aerosols under controlled experimental conditions. M. BIZJAK, B. DIVJAK, A. BERNER and V. HUDNIK S659

Posters

Nuclear microscopy of individual atmospheric aerosol particles. I. ORLIĆ, Y. K. NG, F. WATT and S. M. TANG S661

Investigation of chromium and nickel species in test aerosols. T. HARJU, C. BARNOWSKI, W. DREWS, N. JAKUBOWSKI, J. A. C. BROEKAERT and D. KLOCKOW S663

XRF determination of trace elements in aerosol insoluble matter in North Italian precipitation samples. A. TESTA and R. MOSELLO S665

The interaction of seasalt-aerosol with nitric acid. H. M. TEN BRINK and H. SPOELSTRA S667

Interaction of radioactively labelled NO_2 with diesel and iron oxide aerosols. M. KALBERER, M. AMMANN, K. TABOR, Y. PARRAT, S. NYEKI, E. WEINGARTNER, D. PIGUET, D. T. JOST, A. TÜRLER, H. W. GÄGGELER and U. BALTENSPERGER S669

The soil factor in Rautavaara aerosol in positive matrix factorization solutions with 2 to 8 factors. T. YLI-TUOMI, P. PAATERO and T. RAUNEMAA S671

COURSE DUST

Orals

Recent developments in total dust sampling. P. HOFSCHREUDER, J. PAUWELS and E. VRINS S673

Measurement of the deposition velocity of particulate matter to building surfaces in the atmosphere. R. AKSU, H. HORVATH, W. KALLER, S. LAHOUNIK, P. PESAVA and S. TOPRAK S675

Experimental studies of the aspiration efficiencies of blunt aerosol samplers at large angles to the wind. A. SREENATH, G. RAMACHANDRAN and J. H. VINCENT S677

Poster

Measurements of airborne carbonaceous fly-ash particles during two polution episodes in central London. N. L. ROSE and X. LONG S679

PM10

Orals

How contribute emission of PM10 and meteorology to concentrations of fine particles in The Netherlands. J. T. VAN DER WAL and L. H. J. M. JANSSEN S681

The variability of PM-10 concentrations in The Netherlands; implications for a smog warning system. H. NOORDIJK S683

Characterization and source apportionment of particulate matter in the Czech Republic. R. K. STEVENS, J. P. PINTO, Y. MAMANE and R. D. WILLIS S685

Particulate tracers for source attribution: potential for application to California's San Joaquin Valley. J. M. ONDOV S687

SOOT

Orals

Comparison of methods for the concentration measurement of black (carbonaceous) aerosol in ambient air. P. BERGHMANS, J. PAUWELS, E. ROEKENS and R. BOGAERT S689

A new network-ready instrument for the measurement of particulate carbon in the atmosphere. H. PATASHNICK and E. RUPPRECHT S691

Laboratory calibration of a soot photometer for the spectral light absorption of atmospheric aerosol samples. M. BUSSEMER and J. HEINTZENBERG S693

Hydration properties of diesel soot particles. E. WEINGARTNER, H. BURTSCHER and U. BALTENSPERGER S695

Size distribution of Ir-tagged soot from diesel sanitation trucks. A. E. SUAREZ, P. F. CAFFREY, J. M. ONDOV and K. C. THAUNG S697

Laser-induced incandescence method for ultrafine particle sizing. A. V. FILIPPOV and P. ROTH S699

Heterogeneous condensation properties of ultrafine soot particles ($20\ nm < d_p < 100\ nm$) after reaction with ozone. R. KOTZICK, U. PANNE and R. NIESSNER S701

Methods for the determination of the contribution of DEP to fine dust by use of a toxicologically relevant marker. J.-P. KIMMEL, M. MARTENS, P. SCHEEPERS and R. BOS S703

Posters

Removal of soot particles from diesel exhaust. T. CIACH and T. R. SOSNOWSKI S705

Immunological detection of 1-nitropyrene—a possible marker compound for diesel soot. J. ZÜHLKE, B. FRÖSCHL, D. KNOPP and R. NIESSNER S707

Soot structure investigation: adsorbtional properties. E. F. MIKHAILOV, S. S. VLASENKO, T. I. RYSHKEVITCH and A. A. KISELEV S709

Restructuring of soot particles: experimental study. E. F. MIKHAILOV, S. S. VLASENKO, A. A. KISELEV and T. I. RYSHKEVITCH S711

On the recognition of soot agglomerate morphology from light scattering/ extinction measurements. S. DI STASIO S713

Measurement of soot production of a candle under microgravity conditions. W. OOSTRA, D. BRYANT, J. C. M. MARIJNISSEN, B. SCARLETT and J. WISSENBURG S715
